2. May. 1968.	1745	57	28 Mcs.

W/9 4T

The rig here was an American NCX-5 driving into a Japanese FL1000 linear working 400 watts pep into an American TA33J on 10 to 20m or G5RV on 40 & 80m. The beam is mounted 40 ft. up a 2" pole with a Canadian rotator. (The pole and operator are British.)

An audio speech clipper was used. If the QSO was on split frequency a home built VFO was used with the NCX-5.

The location is 40 km (30 miles) S.E. of London and the nearest town is Sevenoaks 15 km. This rural district forms a part of 'The garden of England', - the main crops being hops (beer trees) and fruit. The site is 650' asl.

Part of my hobby is collecting QSL cards and I would certainly appreciate yours, either direct or via the R.S.G.B. buro.

Please endorse U.S.A. county on your card where applicable.

73,

CHC-2326
